Comments:

- It could be better (than it already is) if you could include some aspects specific to science.
- Although it's hard, it would have helped to record 1-1 with the camera.
- It was awesome!
- Nucleus model → not so helpful for me (but maybe for others)
- If there was more time, I would have been interested to look into the pecking order/rules in the scientific community.
- Time of handing out the course material – at a certain point there had to be taken notes, since it was not predictable what is going to be in the material and what not
